

Discontinuation Notice for EndoWorks[®] Software Solution in 2018

April 1, 2015

Dear Valued Customer,

This letter is to inform you that Olympus has announced the discontinuation of the EndoWorks software platform after 26 years of innovations in imaging and workflow management for endoscopy. A three-year phase out plan has been developed to assist Olympus customers with their ongoing support requirements and migration options to ensure a smooth transition. As part of the due diligence to assist with the migration decision, Olympus is pursuing partnerships with other vendors to provide customers with proven endowriter alternatives to insure a smooth transition between systems.

In accordance with Olympus's product discontinuation policy, we are providing you notice of this phase out so that you can have adequate time to plan for a replacement solution.

Olympus will continue to support EndoWorks until March 31, 2018. During this time, Olympus will gradually reduce the rollout of patches and updates. Onsite (field service) and support from our Technical Assistance Center (TAC), including Remote Access, will continue throughout the phase out period.

The Olympus Endoscopy Account Management Team will contact you to discuss the schedule of discontinuation and initial ideas for determining your suitable path to transition. If you would like further information, please contact your local Account Representative.

We apologize for any inconvenience this may cause your facility. We appreciate your business and hope this notice provides you with adequate time to plan for a software solution.

Thank you for your continued support.

Sincerely,

Olympus America Inc
