

Avoid the Risks of Third-Party Vendors

Keep It Olympus: Buy and Repair Your Olympus Products Only with Olympus

If you are considering a purchase from a third-party vendor, please contact Olympus first.

Product History Check

Buying or repairing a product with a third-party vendor can expose your facility to a range of patient-impacting risks and compliance issues.

To help protect your investment, Olympus offers a model and serial number history check on any products you plan to purchase. This important verification helps you avoid potentially serious situations, such as purchasing:

- Assets not approved for use in the US
- Stolen assets
- Assets written off for destruction
- Olympus-owned assets

Certified Quality with New OEM Parts

Remember, only Olympus can certify our products. Our Certified Pre-Owned (CPO) products are refurbished to “like new” condition and always include the following new OEM parts:

- Insertion Tube
- Biopsy Channel
- New Bulb with CPO Light Source
- Air/Water Channel
- Angulation Wire Assembly
- Bending Section Braided Mesh and Covering
- Olympus also includes a full set of new standard reprocessing accessories

For real-life examples of third-party repairs Olympus has encountered in our service centers, please contact your local sales representative, who can provide the OEM vs. Third-Party Repairs flyer.
